

From AI ambition to enduring advantage.

We help CEOs and boards capture the full value of AI. We set the agenda, build what it calls for, and run it with the discipline of an operator.

WHAT WE DO

Shape, scale, and sustain AI under one accountable partner.

SHAPE

Set the AI agenda the board will fund.

AI strategy, readiness assessments, and Fractional Chief AI Officer and CTO leadership. We identify where value is at stake and build the case to capture it.

SCALE

Move from promising pilots to the P&L.

We engineer agents and AI native products into the systems you already run, or harden what your team has built so it is ready for real customers.

SUSTAIN

Protect the value once it is live.

AgentCare, our monthly managed service, keeps every agent monitored, governed, and improving, with value reported to leadership each month.

AGENTCARE

Run AI like a core business system.

A monthly subscription for agents and AI native products already in production, whether we built them, your team did, or another vendor did.

- Monitoring and response
- Continuous evaluation and model lifecycle
- Cost control and improvement sprints
- A one page value report every month

ENTERPRISE CORE

AI inside the ERP that runs the business.

The greatest value sits in finance, supply chain, procurement, and order to cash. We bring AI into Oracle Fusion ERP, NetSuite, and SAP with controls designed in from day one.

- ERP AI Activation
- Finance and procurement agents
- Segregation of duties and audit trails

NOW IN EARLY ACCESS

EnterpriseOps AI

Find the value hidden in how your business really runs, and turn it into a plan your board can back.

HOW WE ENGAGE

Briefing, Diagnose, Build, Care, Review. Each stage has a defined scope, a named partner, and an explicit decision. Scope and fees are agreed up front, with no lock in.
